Autism Spectrum Disorder (ASD)

F84.0

Persistent deficits in social communication and social interaction across multiple contexts (must meet all 3 criteria in Domain A), accompanied by restricted, repetitive patterns of behavior, interests, or activities (must meet at least 2 of 4 in Domain B). Symptoms present in early development.

Criterion A: Social Communication & Interaction (Requires ALL 3)

Persistent deficits across multiple contexts

☐ A1:

Deficits in social-emotional reciprocity (abnormal social approach, failure of back-and-forth conversation, reduced sharing of interests/emotions/affect).

☐ A2:

Deficits in nonverbal communicative behaviors used for social interaction (poorly integrated verbal/nonverbal, abnormal eye contact/body language, deficits in understanding gestures/facial expressions).

☐ A3:

Deficits in developing, maintaining, and understanding relationships (difficulties adjusting behavior to social contexts, difficulties in sharing imaginative play or making friends, absence of interest in peers).

Criterion B: Restricted, Repetitive Behaviors (Requires >= 2 of 4)

Restricted, repetitive patterns of behavior, interests, or activities

☐ B1:

Stereotyped or repetitive motor movements, use of objects, or speech (simple motor stereotypies, lining up toys, flipping objects, echolalia, idiosyncratic phrases).

☐ B2:

Insistence on sameness, inflexible adherence to routines, or ritualized patterns of verbal/nonverbal behavior (extreme distress at small changes, rigid greeting rituals, need to take same route or eat same food).

☐ B3:

Highly restricted, fixated interests that are abnormal in intensity or focus (strong attachment to unusual objects, excessively circumscribed or perseverative interests).

☐ B4:

Hyper- or hyporeactivity to sensory input or unusual interest in sensory aspects of environment (apparent indifference to pain/temperature, adverse response to specific sounds/textures, excessive smelling/touching of objects).

CLINICAL SPECIFIERS & SUBTYPES

Social Communication Severity:

☐ Level 1 'Requiring support'

☐ Level 2 'Requiring substantial support'

☐ Level 3 'Requiring very substantial support'

Restricted/Repetitive Behaviors Severity:

☐ Level 1 'Requiring support'

☐ Level 2 'Requiring substantial support'

☐ Level 3 'Requiring very substantial support'

Diagnostic Conclusion & Medical Decision Making (MDM):

☐ Full Diagnostic Criteria Met

☐ Sub-threshold Symptoms

☐ Ruled Out (Alternative Differential Documented Below)

Clinician Signature:

Date & Clinical Time:

Monica Preder, MSN, APRN, PMHNP-BC

Board Certified Psychiatric Nurse Practitioner • DEA / WA State APRN on file
