Dissociative Identity Disorder (DID)

F44.81

Disruption of identity characterized by two or more distinct personality states (involving marked discontinuity in sense of self and agency, with alterations in affect/behavior/cognition). Recurrent gaps in the recall of everyday events or trauma.

Criteria A–E Diagnostic Checklist	Distinct personality states + recurrent dissociative amnesia
☐ A: Criterion A: Disruption of identity characterized by two or more distinct personality states (marked discontinuity in sense of self and agency, with alterations in affect, behavior, memory, perception). ☐ B: Criterion B: Recurrent gaps in the recall of everyday events, important personal information, and/or traumatic events inconsistent with ordinary forgetting. ☐ C: Criterion C: Symptoms cause clinically significant distress or impairment in social, occupational, or other functional areas. ☐ D: Criterion D: Disturbance is not a normal part of a broadly accepted cultural or religious practice (in children, not imaginary playmates). ☐ E: Criterion E: Not attributable to physiological effects of a substance (blackouts) or medical condition (complex partial seizures).	

CLINICAL SPECIFIERS & SUBTYPES

Clinical Presentation:

- ☐ Overt identity disruption
- ☐ Covert identity disruption (amnesia gaps predominant)

Diagnostic Conclusion & Medical Decision Making (MDM):

☐ Full Diagnostic Criteria Met ☐ Sub-threshold Symptoms ☐ Ruled Out (Alternative Differential Documented Below)
