

PSYCHIATRIC NURSE PRACTITIONER SERVICES**DSM-5-TR Evaluation Checklist****Monica Preder, MSN, APRN, PMHNP-BC • Board Certified Psychiatric Nurse Practitioner**

Date: September 15, 2026

Practice: Therapeutic Health Services (THS) • Washington State Telehealth

Patient Name:**DOB:****Evaluation Date:****MRN / Chart #:**

September 15, 2026

Post-Traumatic Stress Disorder (PTSD)**F43.10 (Acute) / F43.12 (Chronic)**

Exposure to threatened death, serious injury, or sexual violence. Symptoms persist for > 1 month and include Intrusion (>= 1), Avoidance (>= 1), Negative Alterations in Cognition/Mood (>= 2), and Marked Alterations in Arousal/Reactivity (>= 2).

Criterion A: Trauma Exposure (Requires >= 1)**Direct experience, witnessing, learning of violent death of loved one, or repeated aversive exposure**

- ☐ **A1:** Direct experience of the traumatic event(s).
- ☐ **A2:** Witnessing, in person, the traumatic event(s) as it occurred to others.
- ☐ **A3:** Learning that the traumatic event occurred to a close family member or close friend (must have been violent or accidental).
- ☐ **A4:** Experiencing repeated or extreme exposure to aversive details of traumatic events (first responders, child abuse investigators; not via media unless work-related).

Criterion B: Intrusion Symptoms (Requires >= 1)**Persistent re-experiencing of the traumatic event**

- ☐ **B1:** Recurrent, involuntary, and intrusive distressing memories of the traumatic event(s).
- ☐ **B2:** Recurrent distressing dreams in which the content/affect of the dream is related to the event(s).
- ☐ **B3:** Dissociative reactions (e.g., flashbacks) where individual feels or acts as if event is recurring.
- ☐ **B4:** Intense or prolonged psychological distress at exposure to internal or external reminders/cues.
- ☐ **B5:** Marked physiological reactions to internal or external reminders (elevated HR, sweating, tremor).

Criterion C: Avoidance Symptoms (Requires >= 1)**Persistent avoidance of distressing trauma-related stimuli**

- ☐ **C1:** Avoidance of or efforts to avoid distressing memories, thoughts, or feelings related to the event(s).
- ☐ **C2:** Avoidance of or efforts to avoid external reminders (people, places, conversations, activities, objects) that arouse trauma memories.

Criterion D: Negative Alterations in Cognitions & Mood (Requires >= 2)**Worsened mood and beliefs following the trauma**

- ☐ **D1:** Inability to remember an important aspect of the traumatic event (dissociative amnesia).
- ☐ **D2:** Persistent, exaggerated negative beliefs about oneself, others, or the world ('I am bad', 'No one can be trusted', 'The world is dangerous').
- ☐ **D3:** Persistent distorted cognitions about the cause/consequences of the event leading to self-blame or blaming others.
- ☐ **D4:** Persistent negative emotional state (fear, horror, anger, guilt, or shame).
- ☐ **D5:** Markedly diminished interest or participation in significant activities.
- ☐ **D6:** Feelings of detachment or estrangement from others.
- ☐ **D7:** Persistent inability to experience positive emotions (happiness, satisfaction, or loving feelings).

Criterion E: Alterations in Arousal & Reactivity (Requires ≥ 2)**Trauma-related hyperarousal and reactivity**

- ☐ **E1:** Irritable behavior and angry outbursts (with little/no provocation), verbal or physical aggression.
- ☐ **E2:** Reckless or self-destructive behavior.
- ☐ **E3:** Hypervigilance (heightened watchfulness and scanning).
- ☐ **E4:** Exaggerated startle response.
- ☐ **E5:** Problems with concentration.
- ☐ **E6:** Sleep disturbance (difficulty falling/staying asleep, restless sleep).

Criteria F, G & H: Duration & Impairment**Duration > 1 month + clinical impairment**

- ☐ **F:** Criterion F: Duration of disturbance (Criteria B, C, D, and E) is more than 1 month.
- ☐ **G:** Criterion G: Causes clinically significant distress or impairment in social, occupational, or other functional areas.

CLINICAL SPECIFIERS & SUBTYPES**Dissociative Symptoms Specifier:**

- ☐ None
- ☐ With depersonalization (feeling detached from body or mental processes)
- ☐ With derealization (unreality of surroundings; dreamlike, distant, distorted)

Expression Onset:

- ☐ Standard onset
- ☐ With delayed expression (full criteria met ≥ 6 months post-event)

Diagnostic Conclusion & Medical Decision Making (MDM):

- ☐ Full Diagnostic Criteria Met ☐ Sub-threshold Symptoms ☐ Ruled Out (Alternative Differential Documented Below)
-
